Tesoro
Cross-linked Hyaluronic Acid

The essence of **Tesoro**
: Hyaluronic Acid reimagined

At the heart of Tesoro fillers is Hyaluronic Acid, a natural skin moisturizer whose replenishment can significantly diminish the signs of aging. Tesoro uses innovative cross-linking technology to tailor the balance of cohesivity, elasticity, and plasticity, delivering results that are not just effective but harmonious and long-lasting.

Revolutionary **Production process**

The journey of Tesoro fillers begins in the most sterile environments, where the production of raw materials is safeguarded by a stringent lock system, ensuring unparalleled purity from start to finish. The cornerstone of Tesoro's unmatched quality is its unique technology, a three-stage cross-linking process coupled with an intensive six-stage purification of Hyaluronic Acid. This meticulous approach not only elevates the safety and purity of Tesoro fillers but also enhances their ductility, making them a new generation of aesthetic products.

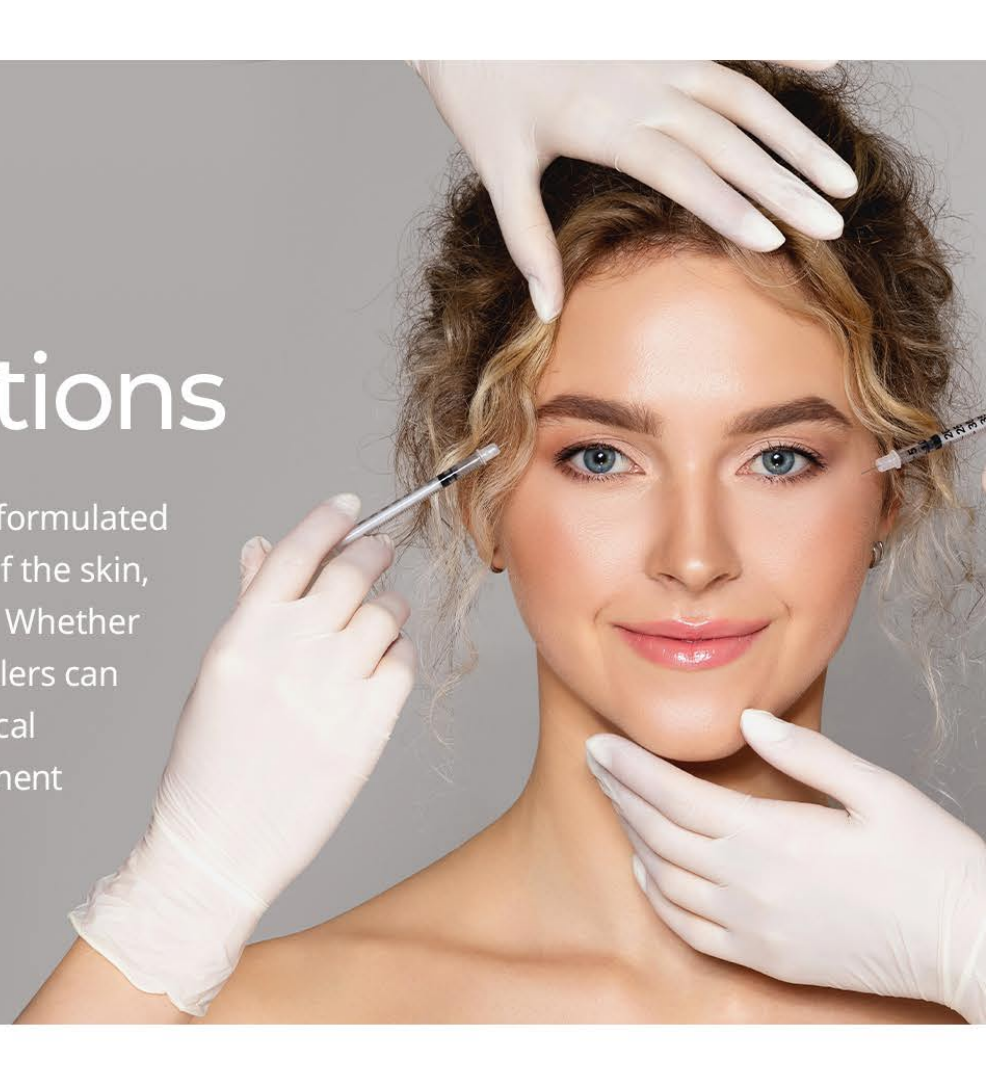
SAFETY

LONG LASTING EFFECT

BEST PROPERTIES

- Ensures minimal swelling post-procedure
- The safest concentration of HA 20mg
- Wide range of fillers with and without lidocaine
- Maximum lasting result

Customizable Aesthetic Solutions



Each product in the Tesoro range is uniquely formulated to meet the structural and functional needs of the skin, allowing for personalized aesthetic solutions. Whether used individually or in combination, Tesoro fillers can achieve sophisticated results, from non-surgical facelifts and wrinkle smoothing to lip enhancement and facial volume restoration.

Why **Tesoro** stands apart ?

Tesoro fillers are designed to integrate seamlessly with tissue, ensuring natural-looking results without altering facial contours. The key to their success is Hyaluronic Acid's ability to retain water, creating smoothness and restoring volume in a way that feels entirely natural.

The commitment to safety and satisfaction

Understanding the temporary nature of these fillers, which are fully biodegradable and leave no trace over time, underscores Tesoro's commitment to safety. This philosophy is further reflected in the stance against permanent fillers, prioritizing patient well-being and satisfaction above all.

The Tesoro range
A solution for every need

with Lidocaine
Non-Lidocaine

Tesoro FINE

Indicated for precise injection into the mid-to-deep dermis layers, Tesoro FINE is specially formulated for the delicate task of smoothing and filling fine lines and wrinkles around the eyes (periorbital) and mouth (perioral), including marionette lines. It is also ideal for subtle enhancement and augmentation of the lips, offering a soft and natural volumization suited for patients seeking gentle contour modifications.

INDICATION

- Fine lines around the eyes (crow's feet)
- Perioral lines (smoker's lines)
- Lip augmentation (enhancing lip volume and definition)
- Tear trough augmentation (reducing the appearance of under-eye hollows)
- Nasolabial folds (smile lines) correction in patients with mild-to-moderate volume loss

with Lidocaine
Non-Lidocaine

Tesoro DEEP

Designed for targeted injection into the mid-to-deep dermal layers, Tesoro DEEP addresses more pronounced facial wrinkles and folds, including moderate-to-severe nasolabial folds. Its robust formulation is tailored for significant volume augmentation, particularly effective in the infraorbital region, to alleviate the appearance of hollows under the eyes, providing a rejuvenated and youthful facial contour.

INDICATION

- Moderate nasolabial folds and marionette lines correction
- Cheek augmentation (enhancing cheekbone definition and mid-face volume)
- Jawline contouring (defining the jawline and reducing jowls)
- Chin augmentation (enhancing chin projection and symmetry)
- Hand rejuvenation (reducing the appearance of volume loss and prominent veins)

with Lidocaine
Non-Lidocaine

Tesoro SUB-Q

Tesoro SUB-Q is specifically indicated for filling deep wrinkles and folds, as well as for the restoration and enhancement of soft tissue volume, such as facial contours and lip volumization. It is equally adept at correcting atrophic scars on the face, offering a versatile solution for deep structural rejuvenation and sculpting needs.

INDICATION

- Deep facial contouring (enhancing cheekbones, jawline, and chin)
- Temple augmentation (restoring volume in the temporal hollows)
- Non-surgical rhinoplasty (reshaping the nose)
- Correction of severe facial asymmetry

with Lidocaine

Tesoro IMPLANT

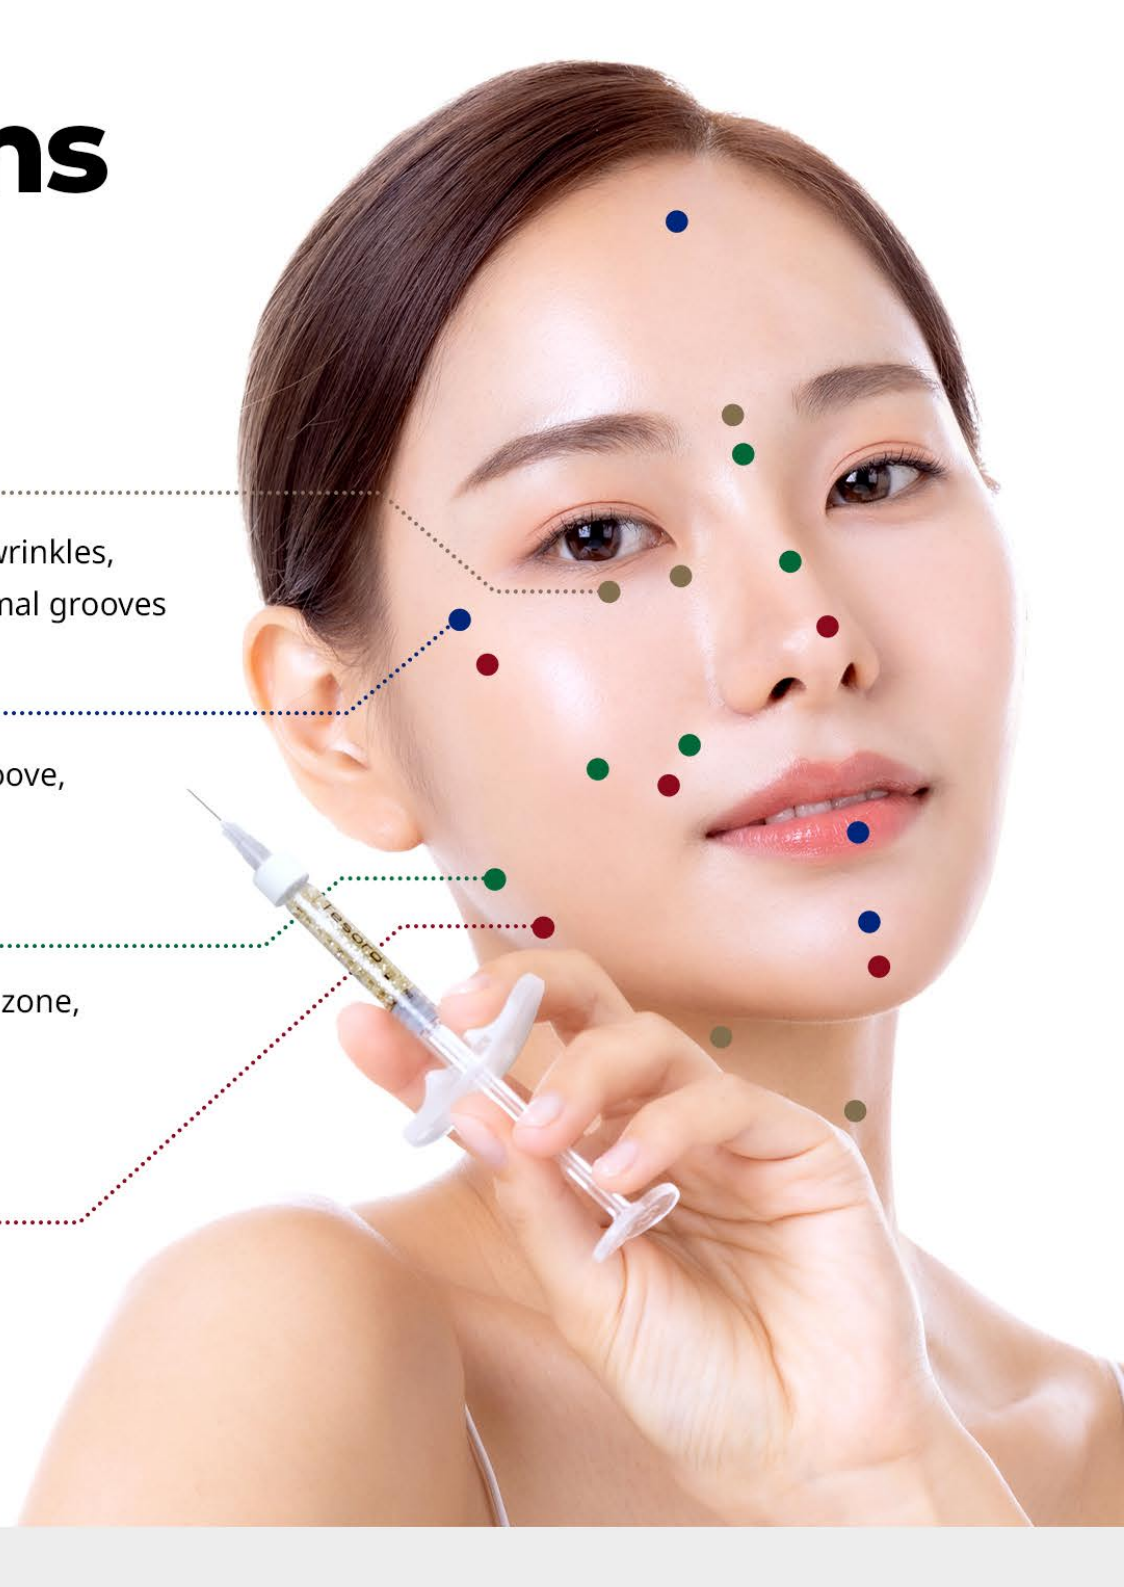
Tesoro IMPLANT is formulated for injection into the deep dermis and subdermal layers for comprehensive restoration of facial volumes. It is the solution of choice for patients requiring significant volumetric enhancement, tackling areas of volume loss and providing a substantial, yet natural, augmentation to achieve a balanced and harmonious facial aesthetic.

INDICATION

- Facial volumization in patients with severe volume loss due to aging or fat atrophy
- Non-surgical facial reshaping (enhancing facial contours and proportions)
- Buttock augmentation (non-surgical butt lift)
- Breast augmentation (limited use due to regulatory restrictions and ongoing research)

By providing a clear, tiered range of products, the Tesoro line caters to a broad spectrum of aesthetic needs, from fine adjustments and soft enhancements to substantial volumetric restoration and structural remodelling, allowing practitioners to tailor treatments to the specific requirements of each patient.

Intructions for use



Tesoro FINE
Superficial wrinkles "pouch", Puppet wrinkles, hands, “rings of venus” and nasolacrimal grooves

Tesoro DEEP
Nasolabial fold, Lips, Palpebromar groove, Bio-reinforcement for scar correction

Tesoro SUB-Q
Zygomatic zone, Chin zone, Temporal zone, Zones of the superciliary arches, Dorsum of the nose (periosteum)

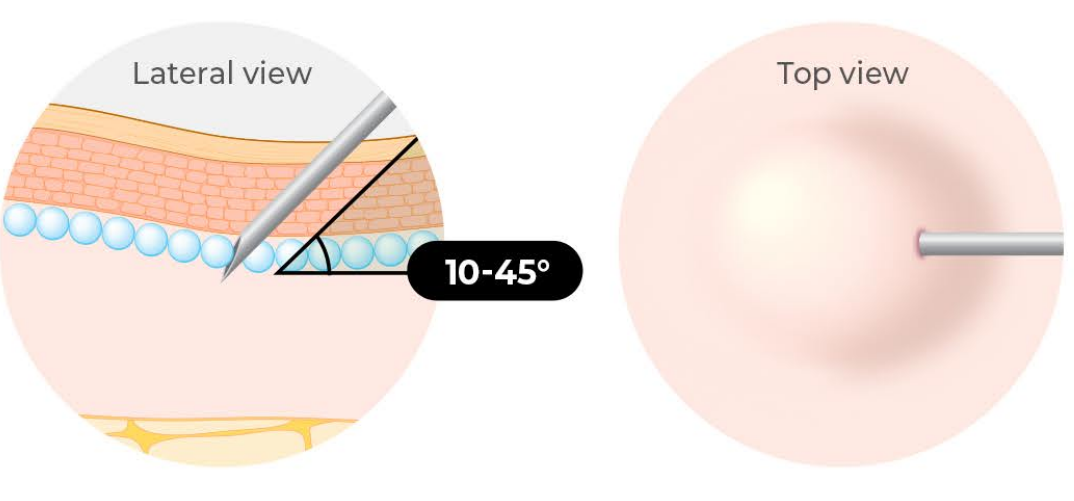
Tesoro IMPLANT
Zygomatic zone, The chin, Face oval

Administration **Protocol**

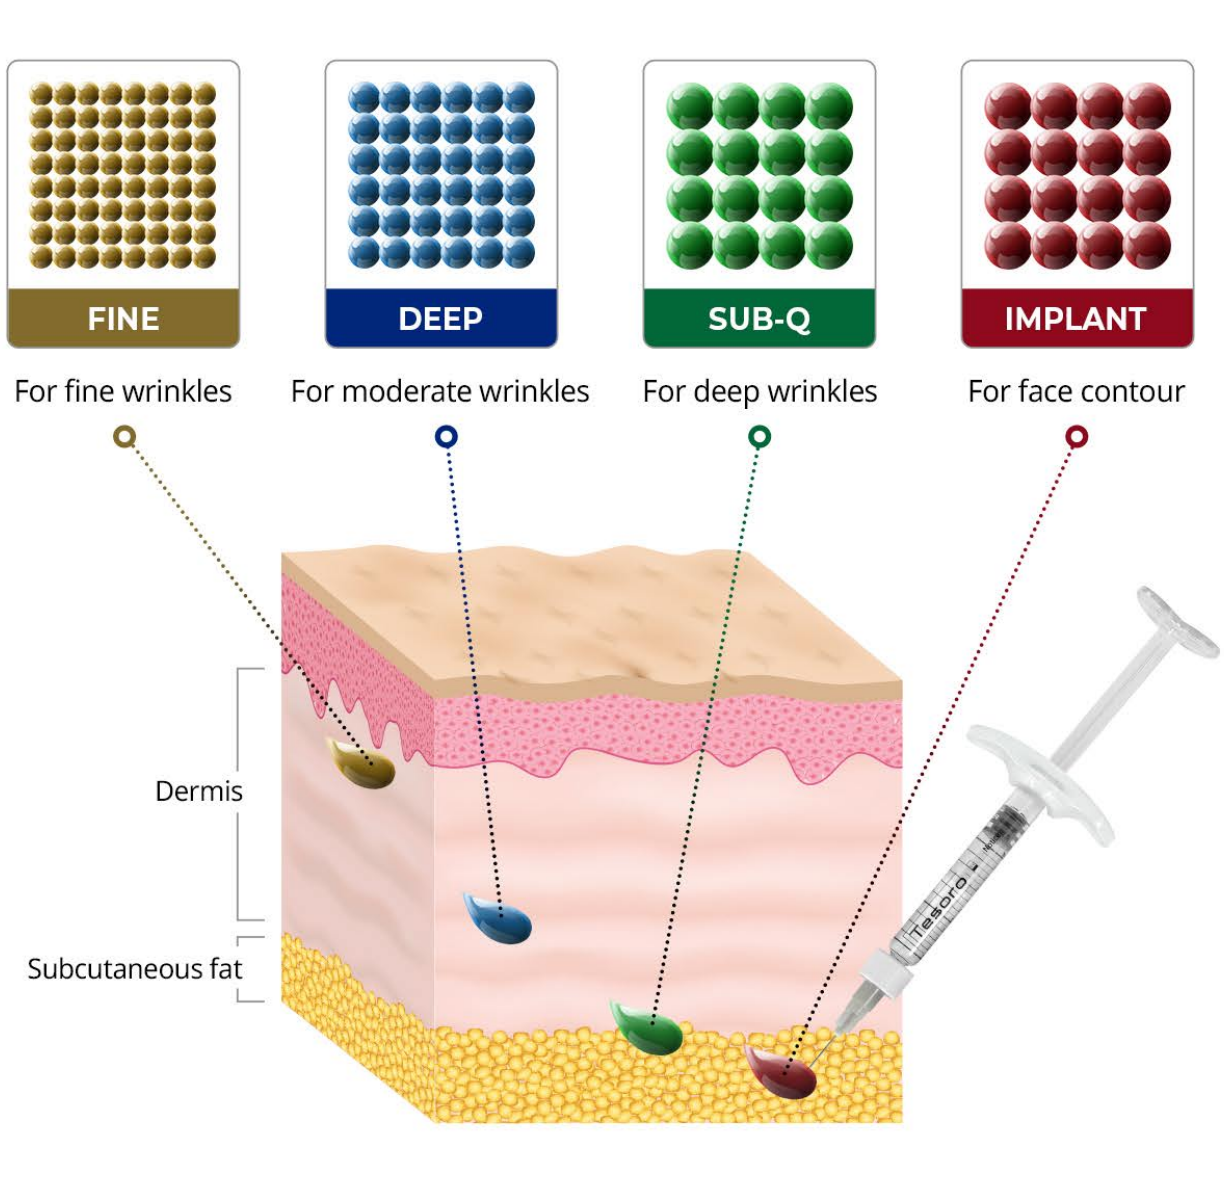
PREPARE THE SOLUTION

1. Ensure the packaging is intact and undamaged.
2. Check the expiration date to ensure product safety.
3. Check the syringe markings to confirm the correct dosage.
4. Carefully screw the needle or cannula onto the syringe. Ensure a secure fit.
5. Hold the syringe firmly and remove the protective cap from the needle end.

WORK PROTOCOL



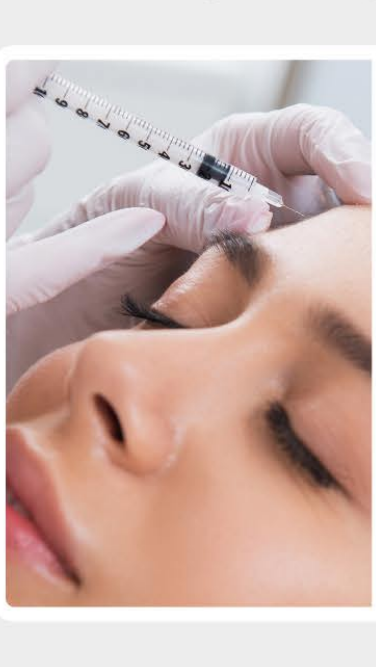
Anesthesia	Local anesthetic cream (optional)
Techniques of Introduction	Linear, Cross-hatching, Fan, Microdroplet, Bolus
Depth	Intradermal - Deep Subdermal
Angle of Inclination	10-45°
Dose per Injection	0.01-0.5 mL



STEP01 PROCEDURE PREPARATION

1. Obtain a comprehensive medical history from the patient.
2. Discuss the benefits, risks, and expected outcomes with the patient.
3. Assessing Treatment Area
4. Determine the appropriate volume and injection sites to achieve desired results
5. Prep the skin with an appropriate antiseptic solution.
6. Check the flow of the filler by depressing the plunger rod before injection.

STEP02 ADMINISTRATION



1. Ensure the needle is not blocked. If resistance is met, replace the needle.
2. Before injecting, aspirate slightly to confirm the needle is not in a blood vessel.
3. Initially inject a small amount of Tesoro, then wait briefly to allow for any included analgesics to take effect.
4. Adjust injection depth and technique (e.g., tunneling, fanning) based on the treatment area and desired outcome.
5. Distribute the filler evenly in small aliquots to avoid lumpiness and ensure a natural look.

STEP03 POST-TREATMENT CARE

1. Gently massage the treated area to mold the filler and achieve a smooth contour.
2. Advise the patient on post-treatment care, including avoiding strenuous exercise and exposure to extreme temperatures for 24 hours.
3. Schedule a follow-up appointment to assess results and determine if additional treatments are necessary.
4. Provide instructions for post-treatment care, emphasizing the importance of reporting any adverse reactions.
5. Encourage the patient to maintain a follow-up schedule to monitor the effects of the treatment over time.

ADDITIONAL TREATMENT SESSIONS

- Assess the need for touch-up treatments based on the initial outcome and patient satisfaction.
- Follow the same procedure for any additional treatments to ensure consistency and safety.

Course of **Procedures**

The course of procedures is **2-3 procedures** with an interval of **2 weeks**.
Repeat the course after 8-18 months.

1st TREATMENT
Initial treatment

2nd to 3rd TREATMENT
Optional : 2-weeks interval

Repeat the procedure
After 8-18 months

Contraindications

- Persons under the age of 18
- Individual intolerance of the drug
- During pregnancy or lactation
- Autoimmune diseases
- With diabetes
- Infections and colds in the acute stage
- Epilepsy
- In case of open ulcers, wounds or damaged skin in the area where the injection is planned
